Adding a controller
To add a controller to the system, click on the New controller tab at the bottom-left corner of the screen, as shown below:

A new window will appear, allowing you to name your controller. Click on the Add button to add the new controller to the system, as shown below:

The `Summary` screen will be displayed, allowing you to enter the details of your controller. For information on how to configure these details, check the Configuring a controller section.
